

NileStarter

EMPOWERING STARTUPS TO BUILD ON HATHOR NETWORK.

Feb 2022

What is NileStarter?

NileStarter will be an IDO platform for the Hathor Network, helping new projects receive the funding they need to build their vision.

By doing this our mission is to make Hathor an even more attractive place for young companies and startups to build.

How will NileStarter work?

Like NileSwap, we pride ourselves on doing right by the Hathor Community, NileStarter will be no different. Projects will have to follow a strict set of rules before applying to use NileStarter.

IDO Projects always come with risks of a project failing to deliver, unfortunately this is something nobody can combat so always DYOR before choosing to invest.

Application Overview

COMPLETE
APPLICATION
FORM

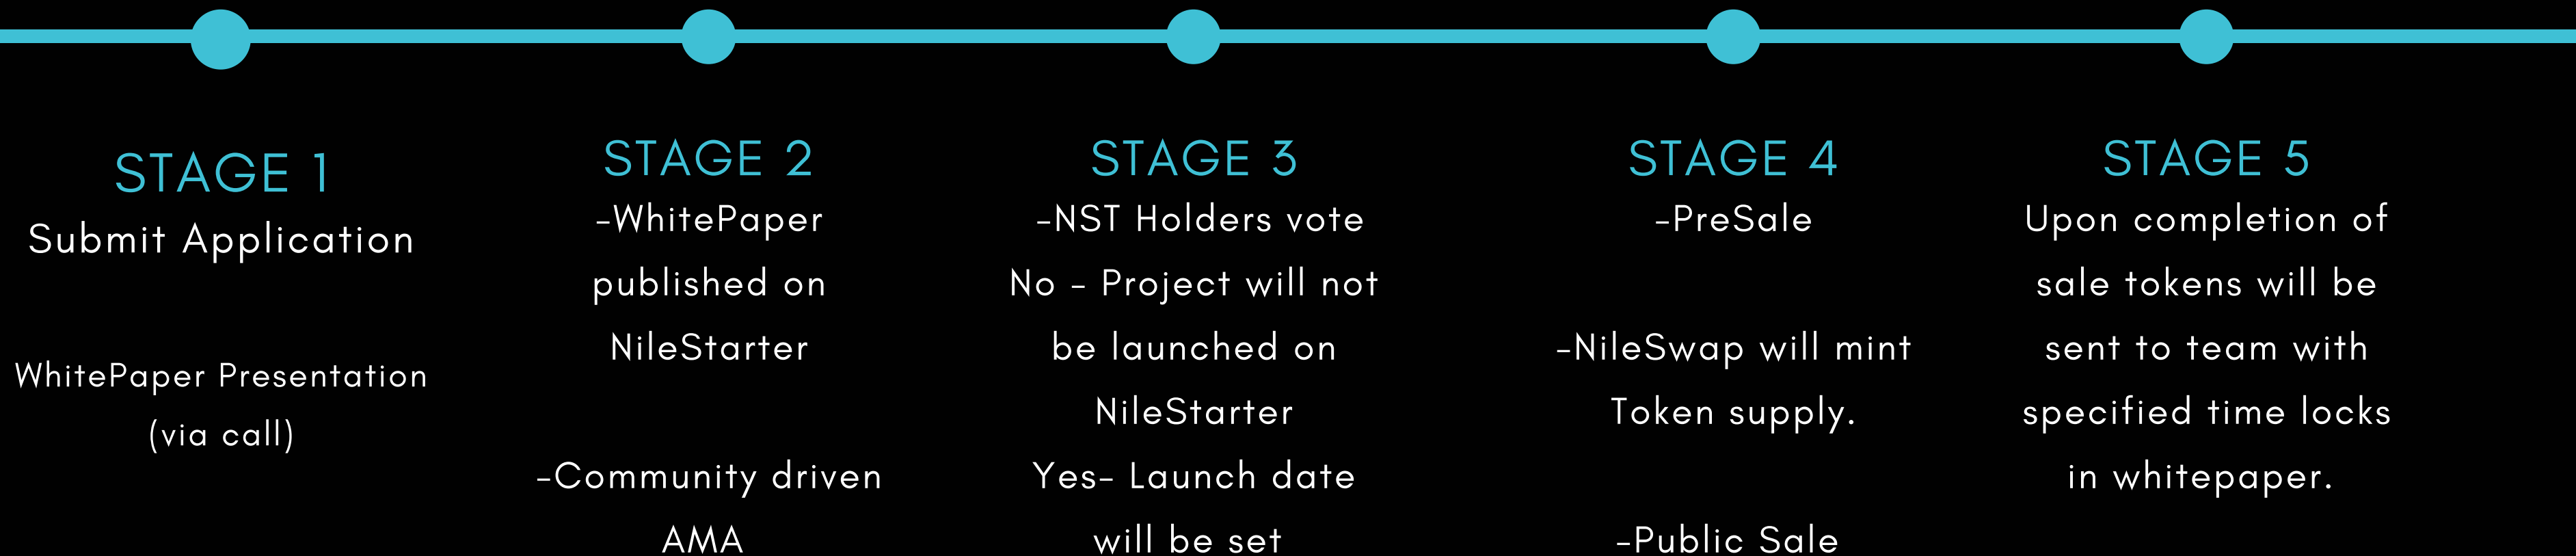

SUBMIT
WHITEPAPER

PROVIDE HTR FOR
INITIAL PRESALE
MINT

PROCESS
SUCCESSFUL:
IDO SUPPLY MINT

PROCESS
UNSUCCESSFUL:
HTR REFUNDED

The Full Application Process

Stage One

Submitting an Application

Once a project has submitted an Application it will be reviewed by the NileStarter team, if deemed successful applicants will be requested to present their WhitePaper via conference call and answer any questions we may have.

Stage Two

The Community

Upon passing Stage One the applicants WhitePaper will be published on the NileStarter website for a set time to give the community time to review it.

Following on from this will be a community driven AMA via a call for the community to ask any questions.

Stage Three

NST Holders Vote

Once the AMA has been completed the NileStarter website will be open for NST holder to vote on the project.

1 NST = 1 VOTE

Results:

Yes - Project IDO date will be set.

No - Project will not launch via NileStarter

Stage Four

PreSale & Public Sale

PreSales will be open to NST holders - Upon completion of presale NileStarter will mint the supply and the Public Sale will go live.

Upon completion of the Public sale NileStarter will turn off the mint function keeping trust in the community that projects cannot unfairly mint more tokens.

Stage Five

Funds Distributed

Upon completion of the IDO funds will be sent to the project

NileStarter will send these funds (Project tokens & HTR) with the relevant time-locks as per the Whitepaper.

The mint wallet used to mint the Project tokens will be burned so more tokens cannot be minted or burned.

What if the IDO fails?

1.

During the sale Tokens will be locked to users accounts.

2.

If the IDO does not reach its minimum presale % the tokens will be exchanged automatically back into HTR.*

3.

IDO tokens will be burned.

*Failed IDO's will not incur any fees, NileStarter users will be 100% refunded

Tokenomics

Development
50%

Development

50% of NileStarter revenue will be allocated to the team to be used for future development.

IDO Token Liquidity

30% of NileStarter revenue will be used to strengthen the pool of the IDO token.

Tokenomics

NST Liquidity

20% of NileStarter revenue will be used to strengthen the NileSwap Token Liquidity Pool.
